

Actividad 6 - Diagramas de Venn.

4) Realizar las operaciones.

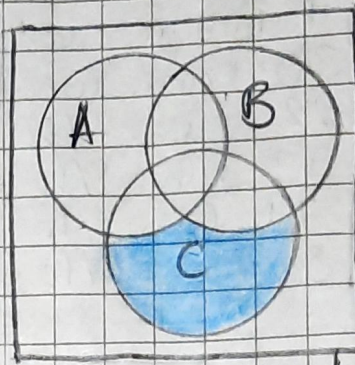

a) $(A' - B) \cap C$

(A')

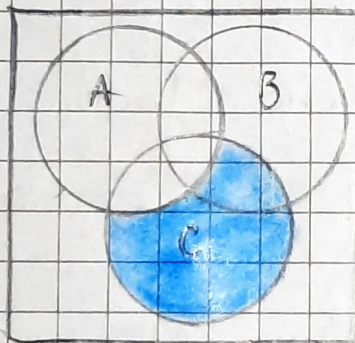

$(A' - B)$

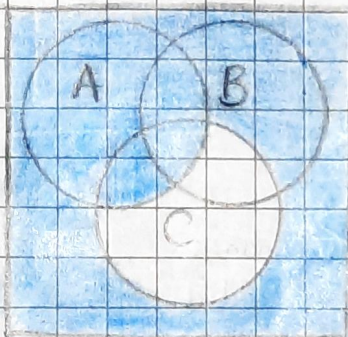

$(A' - B) \cap C$

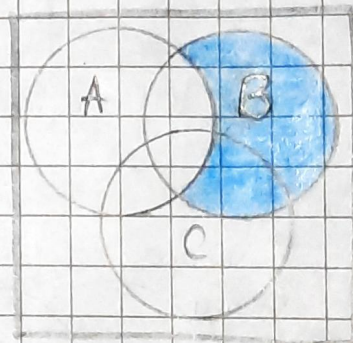

b) $(C - A)' \cup (B - A)$

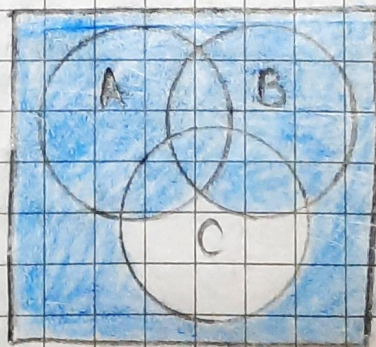

$(C - A)'$

$(C - A)'$

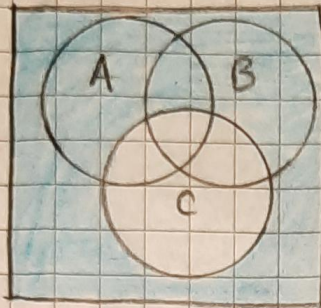

$(B - A)$

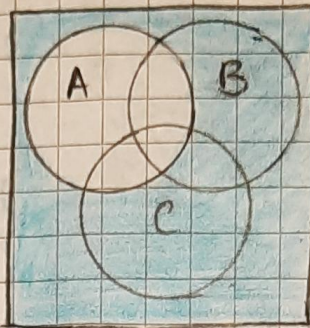

$(C - A)' \cup (B - A)$

Mony B.

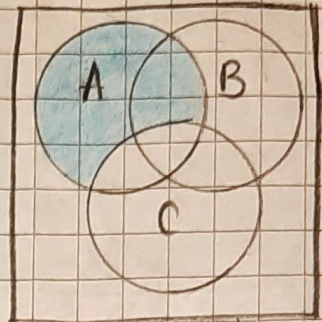

$$c) (C' - A')' \cap (B \cup A)$$

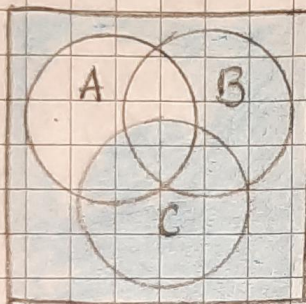

$$(C')^{\uparrow}$$

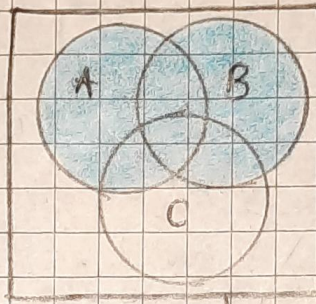

$$(A')^{\downarrow}$$

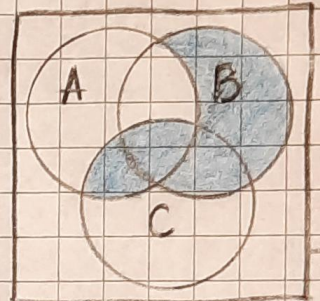

$$(C' - A')^{\downarrow}$$

$$(C' - A')^{\downarrow}$$

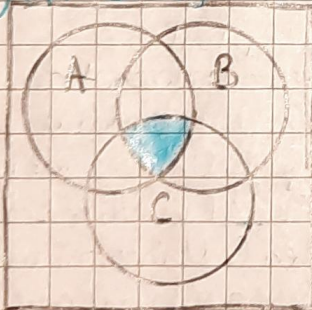

$$(B \cup A)^{\uparrow}$$

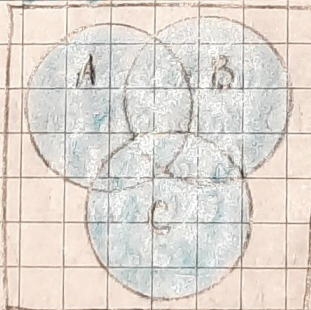

$$(C' - A')' \cap (B \cup A)^{\uparrow}$$

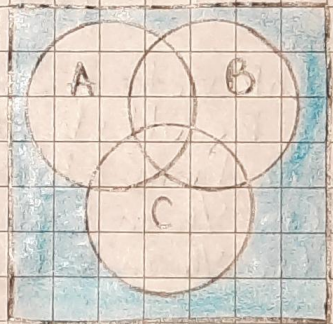

$$d) (A \cap B \cap C) \cup (A \cup B \cup C)'$$

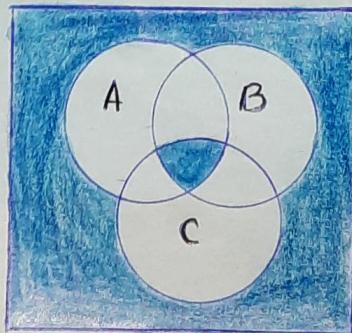

$$(A \cap B \cap C)^{\uparrow}$$

$$(A \cup B \cup C)^{\downarrow}$$

$$(A \cup B \cup C)^{\downarrow}$$

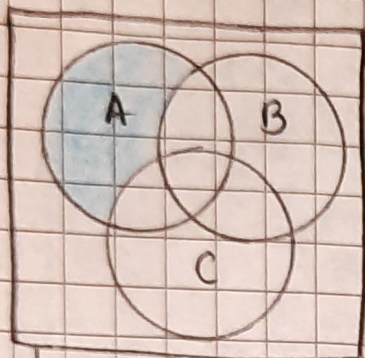

$$(A \cap B \cap C) \cup (A \cup B \cup C)^{\downarrow}$$

Mony B.

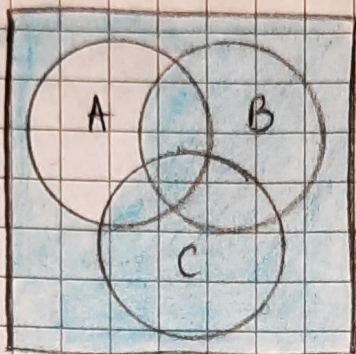

10 / 09 / 23

Mony B.

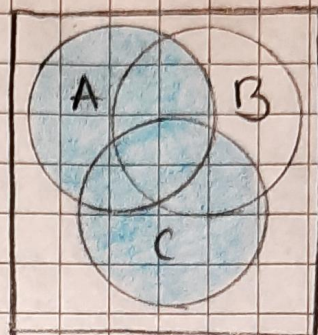

e) $(A-B-C)' - (A \cup C)$

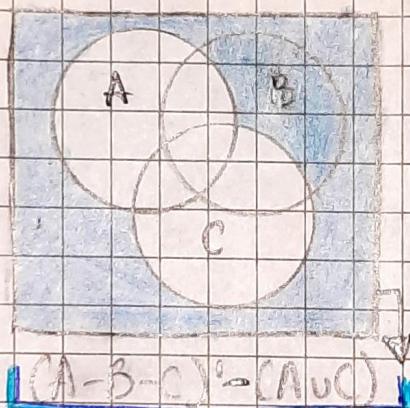

$(A-B-C)$

$(A-B-C)'$

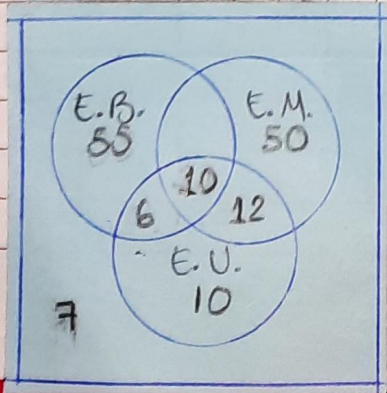

$(A \cup C)$

$(A-B-C)' - (A \cup C)$

2) Resolver los problemas con ayuda de Diagramas de Venn.

a) Entrevista a 150 familias sobre el nivel ^{actual} educativo de sus hijos. Resultados: *10 Fam. c/h en E. Básica, E. Media y E. Universitaria. *16 Fam. c/h en E. Básica y E. Universitaria. *22 Fam. c/h en E. Media y E. Universitaria. *32 Fam. c/h en E. Media. *71 Fam. c/h en E. Básica. *38 Fam. c/h en E. Universitaria.

- Número de familias que sólo tienen hijos universitarios: 10 ($10+12+6=28$ | $38-28=10$)
 - Número de familias que sólo tienen hijos en dos niveles: 18 ($6+12=18$)
 - Número de fam. con hijos sin estudiar: 7 ($55+50+6+10+12+10=143$ | $150-143=7$)

Scribe

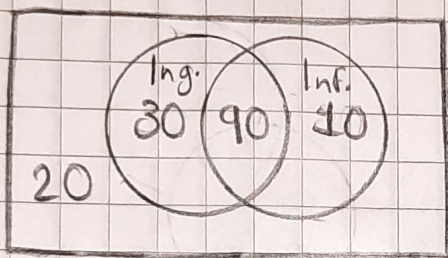

b) Son 150 alumnos de un colegio.

120 estudian inglés.

100 informática

20 ninguna de las dos.

c) Cuántos estudian ambas materias? 90

$$150 - 20 = 130$$

$$130 - 120 = 10$$

$$130 - 100 = 30$$

$$10 + 30 = 40$$

$$130 - 40 = 90$$

$$120 - 90 = 30$$

$$100 - 90 = 10$$

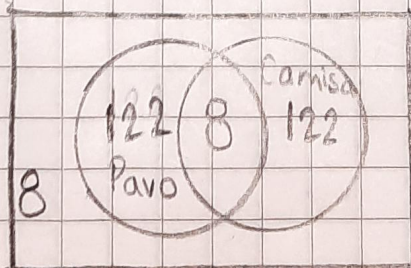

c) 260 empleados.

Camisa para la mitad de empleados (fiestas patrias).

Pavo " " " " " (Navidad).

Sólo 8 empleados recibieron ambas cosas durante el año.

c) Cuántos empleados no recibieron ningún regalo durante el año? 8

$$260 \div 2 = 130$$

$$130 - 8 = 122$$

$$122 + 122 = 244$$

$$244 + 8 = 252$$

$$260 - 252 = 8$$
